## REMARKS

The amendments to the specification correct typographical errors in the original Japanese specification, all of which are apparent when read in the context of the entire specification. Support for the term "mRNAs" can be found at, for example, page 7, line 35 to page 8, line 1. The amendments also correct the title, add a cross-reference to related applications, and insert into the specification a paper copy of the sequence listing in which the general information has been updated to reflect accurate information for the instant application. No new matter has been added.
